Daniel Ungar is an attorney in our Electronic Payments practice group, working closely with our Privacy & Data Security and Intellectual Property & Information Technology practice groups.

His intellectual property, corporate, and commercial law practice focuses on FinTech, data privacy and security, digital payments, and technology licensing. Daniel drafts and negotiates a wide variety of commercial agreements including software and IP licensing agreements (inbound and outbound), development, supply, and procurement contracts, payment processing agreements (including ISO, agent, and bank sponsorship agreements), NDAs, and website terms/privacy policies.

A contributor to our Electronic Payments Law blog, Daniel has served as a patent examiner for the U.S. Patent & Trademark Office in the field of cryptography and is a former law clerk to Judge Mark A. Goldsmith in the U.S. District Court for the Eastern District of Michigan.
